Fair Lawn High School
Science Progressions
Updated 11/1/19

Placement into certain classes is
based on math and science
pre-requisites. Movement "up" a
level (ie: CP to honors) may
require approval from the science
supervisor.

Three Years of Lab Science are
required for high school graduation.
They must address biology, earth,
and physical science (including
biology and two selections of
environmental, geoscience,
astronomy, chemistry, physics,
and/or physical science, according
to various sequences). Based on
certain electives, Four Years of
Science may be required to meet
all these standards.

*If an elective is taken in grade 11,
physics must be taken in grade 11 or 12 to complete the
graduation requirement.

**If Chemistry is taken in grade 11, it is recommended that physics is
taken in grade 12. See supervisor for details.

^ FDU Middle College credit is available for this course.

# This class may not be NCAA approved for scholarships.
